

I had the honor to take on the Safety Coordinator position for Glacier Construction in 2012. As a safety coordinator my roles are to make sure that we all understand the importance of a safe work place, and ensure the safety and well being of all Glacier employees.

Teaching employee's safety guidelines, ongoing program trainings, site safety inspections and making certain that Glacier is always in OSHA compliance have been some of my major responsibilities. I, together with our office personnel, superintendents, foremen, employees and all subcontractors have done an excellent job of following policies.

In 2012, Glacier crews accumulated 219,000 man-hours, and Glacier was able to send every employee home safely.

I am looking forward to yet another safe year at Glacier, and continued hard work, dedication, and great effort in 2013.

Best Regards,
Vicente Rodriguez

ANNIVERSARIES

January

Amy Buechel - 12 years	Levi Espinoza - 7 years
Florencio Lopez - 7 years	Israel Alarcon - 7 years
Mark Holtmann - 6 years	Alejandro Luevano - 5 years
Gerardo Moreno - 3 years	Tyler Linn - 2 years

February

Oscar Hurtado - 10 years	Guillermo Jurado - 10 years
Rita Barker - 8 years	Jose Silva - 5 years
Luis Soto-Escarcega - 5 years	

March

Steve Stephenson - 15 years	Trent Jones - 11 years
Luis Alvarez - 11 years	Maurilio Mendoza Perez - 2 years
Jose Molinar Leon - 1 year	

Nearly every employee has had the opportunity to work with Ray Smith. As a Glacier employee for nearly 8 years, Ray has been a Superintendent for many of Glacier's projects. Though his expertise is in mechanical and pipe, Ray is also a skilled operator and excavator. 2012 was an adventure for Ray, as he traveled to South Dakota as Superintendent for Glacier's projects in the Black Hills area. When asked what he enjoys the most about working for Glacier Construction, Ray replies, "The people!"; though he is not normally a man of so few words.

Ray lives in the Parker area, with his wife Jennifer, a Project Manager for Glacier Construction. Ray and Jennifer have 4 children, Saige 14, Tayelor 11, Madisyn 8, and Ray Jr. 2. In his spare time, Ray enjoys sports, fishing and the outdoors, but prefers to spend time with his family.

FEATURED CURRENT PROJECTS

1044: James R. DiIorio WRF Ammonia and Nutrient Removal Project - Pueblo, Colorado

Work on this project includes constructing and placing into operation new UV disinfection, new biological wastewater treatment basins, new additional aeration basins, replacing the existing aeration blowers, centrate equalization basin, replacing the dissolved air flotation system pumps, yard piping and site work, HVAC work associated with the blower building expansion, electrical, and instrumentation and controls.
